

ERIK SORTINO

OPERATIONS & BUSINESS STRATEGY LEADER

Los Angeles, CA | 310-430-4124 | erik.sortino@gmail.com | linkedin.com/in/eriksortino | eriksortino.com

EXECUTIVE PROFILE

MBA-trained operations and business leader with 9+ years of progressive experience spanning frontline supervision, analytics, and management in a technology-enabled SaaS/marketplace environment. Led teams, partner networks, enterprise programs, budgets, service performance, customer retention, and AI-enabled operational improvement. Combines operational judgment with data analysis, financial discipline, customer/partner management, and cross-functional execution.

CORE CAPABILITIES

Business & Operations Strategy • SaaS & Marketplace Operations • Program Management • Enterprise Customer Success • Partner & Vendor Management • Revenue Operations • SLA / KPI Management • Budget & Cost Management • Root-Cause Analysis • Process Improvement • AI-Enabled Operations • Workforce Management

PROFESSIONAL EXPERIENCE

HONK Technologies | Los Angeles, CA | Dec 2016 – Mar 2026

Operations Manager | Jan 2021 – Mar 2026

- Led technology-enabled roadside service operations across internal teams, external service-provider networks, enterprise customers, and offshore/BPO leadership structures; managed 12 domestic staff and a network that grew to roughly 300 external partners.
- Managed approximately \$1.8M in annual operating budget and ~\$500K in vendor spend, including rate review, invoice validation, payment approvals, cost variance, fraud/risk investigations, and profitability initiatives; contributed to approximately \$400K in annual savings.
- Owned operational performance across dispatch, provider acceptance, response time, SLA attainment, escalations, coverage, customer experience, and recovery plans; supported approximately 850K annual service events.
- Managed enterprise programs and relationships including performance reviews, QBRs, executive escalations, implementations, renewal/retention risk, and corrective-action plans; translated service failures into customer and financial impact.
- Negotiated provider agreements, rates, and SLA expectations with small and midsize service businesses; supported provider acquisition, activation, retention, churn management, and marketplace supply expansion.
- Partnered with product and engineering on automated dispatch, voice-agent workflows, failure tagging, AI training/QC, and operational feedback; helped identify failure patterns across rate, distance, geography, vehicle/service capability, ETA, and provider availability.
- Used Looker, Excel, SQL-based analysis, Salesforce, Pipedrive, Asana, Jira, Zendesk, Google Workspace, Slack, and related tools to manage performance, investigate root causes, and coordinate cross-functional work.
- Supported high-profile mobility and insurance programs, including roadside and specialized operational workflows, while maintaining customer experience performance above 80 NPS in key periods.

Account Analyst | Jan 2018 – Dec 2020

- Analyzed customer, provider, service, and operational performance data to identify service gaps, geographic coverage issues, cost drivers, customer-impacting failures, and opportunities for operational improvement.
- Built recurring reporting and analysis using Looker, Excel, and SQL-based queries; supported business reviews, SLA analysis, provider performance management, forecasting, and operational decision-making.
- Investigated service failures and NPS detractors through postmortem/root-cause analysis, connecting survey feedback to dispatch, ETA, coverage, provider, rate, and process issues.
- Translated operational findings into SOP changes, provider/network actions, training, escalation paths, and product/automation feedback.

Operations Supervisor | Dec 2016 – Dec 2017

- Supervised frontline roadside operations, escalations, dispatch execution, staffing, service quality, and shift performance in a high-volume, time-sensitive environment.
- Coached team members on customer experience, operational procedures, escalation handling, schedule adherence, and service-level performance.

BUSINESS, ANALYTICS & TECHNOLOGY

Analytics: Excel, Looker, SQL, Power BI | CRM/CS: Salesforce, Pipedrive, Zendesk, HubSpot | Program/Work: Asana, Jira, Monday.com, Slack, Google Workspace, Microsoft Teams/SharePoint | Operations: workforce management, vendor/network performance, fleet/service operations, process automation, AI-assisted workflows
